U.N. - A TOWER OF BABEL

"The UN is the biggest Fifth Column in the World."

Congressman James B. Utt

By J. Johnson McCauley

In November 1949, proposals were made that the United States of America become aligned with the United Nations, which obviously meant that America join a world-government. Proposals which, surprisingly, had been given respectful consideration in hearings before the Foreign Affairs Committee of the lower House of Congress, actually were suggestions that we abolish the United States Constitution, which would mean the abolishment of our Republican form of government.

This was made clear by the specifications for the world super state as promulgated by its advocates.

Among a variety of extreme internationalist organizations enlisted in the scheme, the principal leaders were United World Federalists, Inc., and Union Now, and each had prepared pamphlets outlining its ideas of how world government should function.

One of these, issued by the World Federalists, stated:

"World law shall be enforceable directly upon individuals."

That declaration indicates that the American people would give up their rights to make their own laws, and obey laws made for them by alien politicians who do not understand and who have no regard for our American ideals of individual liberty.

The World Federalist pamphlet also stated:

"The world federal government should have authority to raise dependable revenue under a direct taxing power independent of national taxation."

That means foreign politicians, envious of American prosperity and unshakably convinced the United States is possessed of unlimited wealth, would decide how much taxes we should pay without having to consult our own Government in the matter.

If one would imagine that we would not pay the bulk of the taxes to support a world government, consider the fact that we are already paying the bulk of the cost of the maintenance of the infamous United Nations.

The World Federalist program continues:

"Such a world government should possess provisions prohibiting possession by any nation, of armament and forces beyond an approved level required for its internal policing."

It adds that would be "armed forces as may be necessary to enforce world law."

Which means this country would strip itself of all power of self defense and would be thereafter at the mercy of a well-armed international mercenary force responsible to whatever clique of alien politicians gained control of the world government, quite possibly a communist clique, and certainly at the very least a socialist clique, since virtually all Europe is either communist or socialist. On top of all this a proposal to make this country's ruination final and complete is put forward by the Union Now advocates. Its booklet states:

UNITED NATIONS FLAG

RUSSIAN ARMS BANNER

A study of these emblems shows a shocking similarity. The Russian Arms Banner, which occupies the highest place in Soviet heraldry, is not to be confused with the Hammer and Sickle. The only picture that appears on Russia's so-called Constitution is the Arms Banner portrayed above. The United Nations was conceived in red internationalism and bears the mark of its sinful paternity.

"The union (world government) would take over the gold reserves of member nations, and their currencies and present national debt obligations."

This means the gold hoard at Fort Knox, Kentucky, would be seized by the European politicians in charge of the world government and be spent by them for their own personal aggrandizement as well as their own countries. It means also they could, and quite naturally would, cancel any debt owing to the United States by other nations, automatically confiscating the billions of dollars the taxpayers of this country permitted the Federal administration to loan abroad. Obviously, then, if we joined a world state, we would be stripped of all our essential powers. It would cease to be a government, and would cease to exist as a free nation, and the American citizenry, their divinely inspired Constitution abrogated and destroyed,

would lose their precious liberties and become slaves of a world super state founded on the Marxian Socialist philosophy that the individual is not the master of his government, but its servant.

How could any American, however bemused by wishful dreams or obsessed by baseless terror, advocate this monstrous act of national self-destruction? How can members of the Upper and Lower Houses of Congress, sworn to defend the Constitution, listen with respectful complacency to these outrageous proposals that they enact laws for America's destruction? Finally, how, especially, could loyal Americans sit silent and permit this dangerous and disloyal movement to go unchallenged? Well, they did, and unless we get rid of the Federal Reserve System and the United Nations, we will wake up some morning and find our Constitution scrapped, and in its place, the United Nations Charter. Right now, is the time for all patriotic Americans to intervene and make it plain that they still cherish our free enterprise system their fore-fathers created for them, and that they have no intention of allowing it to be betrayed and destroyed.
